The **PWCE JIB MAGNET** has replaced a 1950's era crane in unloading gondola cars, as well as semi trucks. Using a Case 621C Wheel Loader, PWCE was able to build an 8' jib attachment for the bucket end. A large 36" magnet was then attached to this jib. Unlike the traditional crane, the **PWCE JIB MAGNET** has the versatility to move all over the yard. It also has the mobility to reach inside the gondola cars.

Paul Wever Construction Equipment is dedicated to product support for the construction equipment industry. We provide owners, operators, and dealers with solutions to their problems. If you have a need for engineering services, new product development, or current product support, please call us.
